PROFILE

Computational linguist and developer, with own projects in language processing, document automation and applied AI: local OCR digitization, intelligent document search with source citations, and terminology management (Python, FastAPI, React, PostgreSQL). Master's in Language Sciences (GPA 9.2/10; thesis with highest distinction). I am looking to join a team where I can apply and keep developing these skills on real projects.

EXPERIENCE

Independent Developer · Own AI and document projects — 2025 – present

- **TalCual**, study assistant for exam-prep academies: answers only from the syllabus, cites the article and page and opens the document at the exact passage; doubtful answers are reviewed by a tutor and saved. Full design and development (FastAPI, LlamaIndex, React), with roles, per-academy data separation and data-protection measures (GDPR).
- **RagDesk**: private document Q&A assistant citing the exact source page, local or cloud; public demo at ragdesk.neupavert.com.
- **Local OCR digitizer**: overhead scanner and fully local text recognition, with automatic cleanup and page-by-page human review; delivered as Markdown and searchable PDF.
- **AlzoLab**: browser-based corpus-linguistics lab (import, cleaning, spaCy, term extraction and concordances), in production.

NLP Developer & Computational Linguist · NeupaTerm — 2025 – present

- Web platform to organize, search and extract specialized terminology in several languages, with glossary export to CSV, JSON and TMX (React, FastAPI, PostgreSQL, spaCy).
- Term-candidate extraction with spaCy (entities, disambiguation and relations) on specialized EN–ES corpora, with no dependence on generative AI.

NLP Researcher — Practicum · Institute of Applied Linguistics (ILA), University of Cádiz — 2025 · 150 h

- Streamlit app for automated cleaning and normalization of large datasets (.txt/JSON) with linguistic quality control; collaborated on a research RAG system.

TECHNICAL SKILLS

Generative AI & RAG	LlamaIndex, Ollama; LLMs to draft answers from retrieved passages (RagDesk, TalCual); citations and retrieval evaluation.
Development	Python (FastAPI, Streamlit), React / TypeScript, PostgreSQL and SQL, Docker.
NLP & linguistics	spaCy (NER, disambiguation, relations), corpus linguistics, terminology and TBX, TMX, XLIFF; Sketch Engine, AntConc.
Documents & data	Local OCR, data cleaning and normalization, structured document extraction; data protection and privacy in document applications (GDPR).
Languages	Spanish (native) · English (professional) · French (basic).

EDUCATION

Master's in Language Sciences (Applied Linguistics) — University of Cádiz · 2024–2025
GPA 9.2/10 · Thesis with highest distinction on the specialized language of video games (EN–ES corpus).

Double Bachelor's: Linguistics & Applied Languages / English Studies — University of Cádiz · 2017–2022

TALKS & PUBLICATIONS

Conference talk — AESLA 2026, Granada · Conference talk — Tránsitos Congress 2026, Cádiz · Poster — AETER Conference 2025
